

# Hydraulic accumulator protection and cut-off unit B20

WK 491 810

NG 20

33 MPa

04. 2003r.

### **APPLICATION**

Safety block is used to connect a hydraulic accumulator to a hydraulic circuit keeping safety rules.

#### **DESIGN DESCRIPTION**

The unit consists of a housing incorporating the following sub-units:

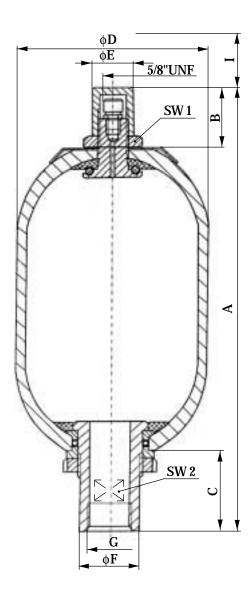

- ball cut-off valve for connecting and disconnecting the accumulator with the hydraulic system
- manual relief valve for safe unloading of accumulator after cut-off
- the valve can be with UDT or CE certificate or without any certificate. If the valve is ordered with the certificate, it is set at the pressure required and sealed.
- solenoid directional valve for electric control of accumulator unloading (in directional valve version)
- threaded flange for connecting the unit to the accumulator (standard flanges enable connecting an EPE accumulator)

#### **TECHNAICAL DATA**

| Rated dimensions                  | 20                                |
|-----------------------------------|-----------------------------------|
| Rated flow (at v=6 m/s)           | 150 dm³/min;                      |
| Working fluid                     | Mineral oil                       |
| Optimum working temperature range | 258 up to 343 K                   |
| Max working pressure              | 33 MPa                            |
| Housing construction material     | steel                             |
| Overflow valve type               | DBDS10K wg WK 450 610             |
| Required oil filtration           | up to 16 μm                       |
| Solenoid directional valve type   | 2URED6C1-01/2M1 NZ4 wg WK 494 920 |
| Directional control valve voltage | 12VDC; 24V DC or 220V 50 Hz       |
| Solenoid power rating             | 26W                               |
| Weight                            | 6,4 up to 6,9 kg                  |
